VDO REDI-Sensor™

The multi-application TPMS sensor service solution that provides extensive domestic, Asian, and European vehicle coverage!

- Ready right out of the box
- Pre-programmed and designed to follow OE relearn procedures
- Reduces inventory and eliminates service delays
- No added programming or cloning steps
- OE designed and validated

REDI-Sensor™

VDO

Save time and money with VDO REDI-Sensor, the most versatile TPMS sensor on the market.

If a shop has the TPMS scan tools and know-how to handle OE sensors, it's ready for REDI-Sensor!

Unlike other sensors that require the purchase of specialized sensor programming tools and software upgrades, no additional purchases, training or investments are needed to get started with REDI-Sensor because it is designed to follow existing OE vehicle relearn procedures with no added steps. If you have the tools and know-how to service OE sensors, you're ready for REDI-Sensor!

Parts stores can also deliver REDI-Sensor without worrying whether their customers have the TPMS scan tools necessary to work with it, because the major TPMS scan tools are compatible!

REDI-Sensor works with all major TPMS scan tools, including: ATEQ, Bartec, and Snap-on.

REDI-Sensor™

Part No. SE10001HP /
SE10001HPR
VDO REDI-Sensor
315 / 314.9 MHz

Part No. SE10002A
VDO REDI-Sensor
315 MHz

Part No. SE10003A
VDO REDI-Sensor
315 MHz

Part No. SE10004A
VDO REDI-Sensor
433.9 MHz

REDI-Sensor makes tire service quicker and easier.

Ready to install right out of the box.

Look no further – REDI-Sensor is the TPMS service solution that the aftermarket has been waiting for! It's simple. Take REDI-Sensor out of the box, install it, and follow the OE vehicle relearn procedure – that's it!

Unlike competitive sensors, there is never a need to 'clone' or to load vehicle software / protocols to a blank 'universal' sensor. These steps take specialized sensor programming tools, which add time, cost and complexity, because you still need to complete the OE vehicle relearn.

Enhanced tire / wheel components.

The REDI-Sensor pivoting metal clamp-in valve stem, combined with technically superior valve stem hardware / sealing components, maximizes wheel compatibility.

The new REDI-Sensor with rubber snap-in valve design clips together without screws or any other attachment hardware and uses no torque tools...the ultimate aftermarket advantage!

Less inventory for parts providers.

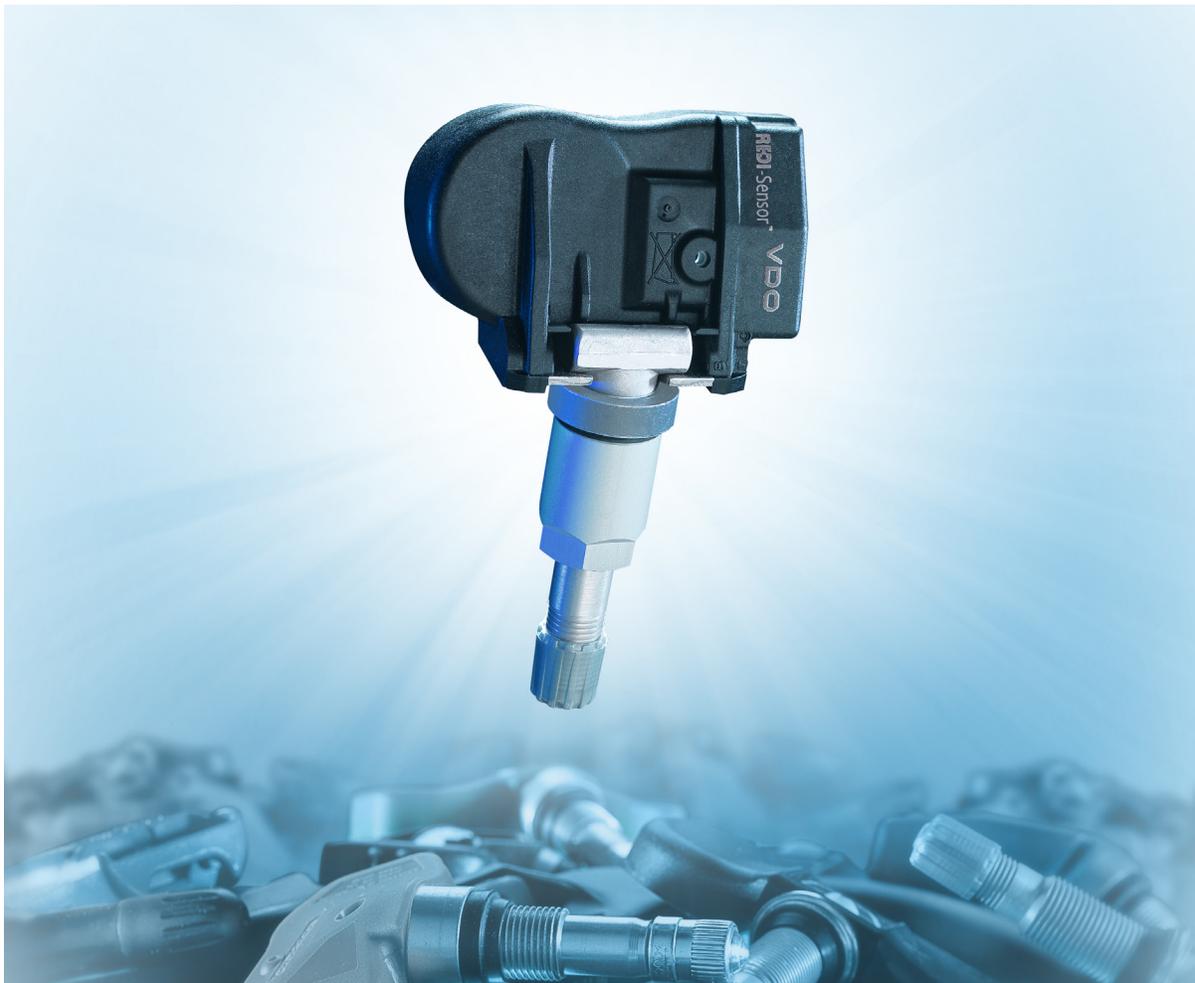

VDO REDI-Sensor replaces a host of OE sensors, including banded, snap-in and clamp-in types from Beru, Continental, Lear, Pacific, Schrader, Siemens VDO and TRW. With REDI-Sensor, parts stores can substantially reduce the number of sensor SKUs required to provide full TPMS coverage and eliminate costly service delays.

Eliminates lost service opportunities.

Service shops only need to keep a small supply of REDI-Sensors on hand to be ready to service practically any vehicle that comes in. No waiting for a part delivery and no lost sales to drivers that can't leave their vehicle.

Reliable, long-standing OE partner.

Continental is a market leader and pioneer in the design and manufacturing of OE TPM Systems, sensors, and tires. Our heritage of trust and innovation was not built overnight. For over a century, Continental has been recognized as a committed partner in the automotive industry.

REDI-Sensor now covers over 120 million vehicles in North America.

VDO REDI-Sensor provides multi-application coverage for a broad range of cars, vans, SUVs, crossovers and light trucks from 2002 – 2019.

Additional Ford, Hyundai, Kia, Nissan and Toyota coverage available now!

Only 5 REDI-Sensor sensor assemblies provide extensive coverage for domestic, Asian and European cars, trucks, SUVs, crossovers and vans, replacing over 280 OE sensor part numbers...and counting!

The hundreds of new applications covered by REDI-Sensor have been added to the already broad and deep coverage of the VDO OE TPMS Replacement Parts Program.

Continually expanding coverage.

With VDO REDI-Sensor, we are researching and validating new vehicle applications daily – ensuring that our REDI-Sensor coverage continues to grow, and our VDO multi-application sensor technology easily syncs with a variety of vehicles.

Scan QR code to watch our videos and look up applications online.

OE engineering for the aftermarket:

- 1 VDO multi-application sensor technology easily syncs with a variety of vehicles
- 2 Ready out of the box! Pre-programmed and designed to follow OE vehicle relearn procedures
- 3 Valve stem and hex nut treated against corrosion
- 4 Valve cap seal minimizes potential air loss
- 5 Pivoting valve stem makes installation easier and accommodates a wide range of wheel rim profiles
- 6 Sensor housing clips onto valve without tools valve or screws
- 7 Robust waterproof design resists tire air moisture
- 8 Technically superior valve sealing design

REDI-Sensor™

A complete TPMS service program.

REDI-Sensor service parts

VDO REDI-Sensor replacement parts and service kits are available and include seal, washer, valve core, hex nut and cap. Replacements are also available for the sensor's durable metal valve stem, which is reusable.

REDI-Sensor Installer Kits

Tackle TPMS service with no waiting for parts delivery! The REDI-Sensor Installer Kit ensures you have the parts you need at your fingertips and all in one place. The kit has simple, easy to access compartments, a key with pictograms for quick reference and extra space for expansion or refill. Now you're ready to go!

TPMS OE replacement parts

In addition to our VDO REDI-Sensor replacement

parts, we also offer OE replacement parts and service kits needed for proper TPMS service including OE application-specific replacement sensor assemblies, service kits and stainless steel wheel bands for valveless sensors.

TPMS OE service kit assortment

Never be stranded without TPMS service parts with the VDO TPMS OE service kit assortment! This comprehensive assortment provides extensive domestic, Asian and European application coverage in a convenient tackle box that helps keep service centers organized, primed for TPMS service and ready to promptly serve their customers.

Make the VDO TPMS Replacement Parts Program your one-stop source for TPMS service parts.

The VDO Advantage

As one of the world's leading OE suppliers of TPMS, we are on the cutting edge of product engineering and development. This means we not only deliver the best technology needed to service today's tire pressure monitoring systems, but also help meet the challenges of tomorrow's TPMS.

Our worldwide reputation for quality and innovation is built on our ability to continually deliver revolutionary solutions for both OEMs and the aftermarket. That's why we are best known for our engineering and technological capabilities and ranked among the industry's top five original equipment manufacturers.

Continental has a strong heritage as one of the industry's leading manufacturers of complete OE Tire Pressure Monitoring Systems, including sensors and related sensor service parts as well as passenger and commercial vehicle tires. All VDO TPMS replacement parts are made in ISO-certified facilities to the same quality standards as the OE parts supplied to automakers worldwide.
