

REDI-Sensor™ 4 Packs

Avoid waiting for TPMS parts deliveries

When a shop has one each of the four REDI-Sensor 4 Packs on hand, they're ready for TPMS sensor replacements on over 90% of the vehicles on the road. That means no delays while waiting for a sensor delivery!

If a TPMS sensor battery dies, it's likely that if the other sensors are the same age, their batteries will go soon too. Replacing all four at once saves your customer from multiple service appointments as each sensor's battery dies. Explain the advantages of replacing all

four sensors at once to your customers, and keep REDI-Sensor on hand to be ready for fast, profitable TPMS service!

Save time and money with REDI-Sensor

- Broad Domestic, Asian, and European coverage with only 4 SKUs
- Pre-programmed at the factory. Just install, scan, and perform OE relearn
- Each REDI-Sensor comes complete with either a metal clamp-in or rubber snap-in valve stem

A brand of AUMOVIO
